CRISPR Technology: Responsible Discourse about Science & Bioethics

CRISPR genetic modification technology is the latest example of “disruptive” biotechnologies that can generate far-reaching and unforeseen consequences. At this symposium, we will explore CRISPR through various lenses in order to better appreciate its diverse bioethical dimensions and implications.

Our goal at this year’s symposium is to generate conversations among a broad range of audiences: members of the public, representatives of regulatory bodies, biomedical researchers, clinicians, patients, humanities scholars, and many others. Active exchange among speakers and audience members will be encouraged throughout the day.

Confirmed speakers include:

Alta Charo • University of Wisconsin

Jacob Corn • Innovative Genomics Initiative

Hank Greely • Stanford University

Ben Hurlbut • Arizona State University

Jonathan Kimmelman • McGill University

Eben Kirksey • University of New South Wales

Paul Knoepfler • UC Davis

Meaghan O’Keefe • UC Davis

Sarah Perrault • UC Davis

Jenny Reardon • UC Santa Cruz

Ken Taymor • UC Berkeley

Patricia Williams • Columbia University

Michael J. Zerbe • York College of Pennsylvania

*Please check the symposium website for the complete Agenda and updated Speakers List.

Third Annual

**UC Davis Stem Cell Research Policy and
Ethics Symposium**

Co-Presented by:

- UCSC Center for Science and Justice

- Center to Advance Science in Policy &

Regulation, UC Berkeley School of Public Health

- Center for Science, Technology, Medicine & Society, UC Berkeley

Thursday
May 26, 2016
9:00 AM – 4:30 PM

**UC Davis
Memorial Union**
*One Shields Avenue
Davis, CA 95616*

*Registration is free.
Preregistration
Required*
